

## WEIGHTED DRAIN COVER

Weighted drain covers provide a simple yet effective method for temporarily sealing a drain pit in the event of a spill.

Designed as an economical solution for your stormwater management, the weighted drain cover comes with a storage bag that can be attached to a wall or similar to ensure it is readily available to deploy in seconds.

### Applications

industrial sites  
vehicle car parks  
loading docks  
fuel storage & transfer areas  
aggregate wash down areas

### Operation

Simply lay over the stormwater grate. The gel filling in the perimeter of the cover allows flexibility so the drain cover conforms to almost any gutter or flooring surface. The cover will sit firmly over the grate edge and drain surrounds.

### Specifications

- 1.2mL x 1.2mW
- 900gsm PVC
- 260gsm nonwoven geotextile underlay
- Gel filled perimeter
- Carrying handles x 4

Code	Length	Width	Weight
ASPWDC1212	1.2m	1.2m	22kg

*Handy for spill response and proactive prevention of stormwater contamination. Use the weighted drain cover to quickly and easily seal off the stormwater drain.*
