

## Removes coarse sediments, oil, litter and debris from runoff.

The Drain Warden operates in a similar fashion to a gross pollutant trap. Runoff water will tend to 'swirl' inside the Drain Warden when it enters the pit. Any particulate greater than the pore size of the fabric will be trapped by the geotextile fabric. The hydrocarbons will be absorbed by the hydrophobic boom suspended beneath the grate.

The Drain Warden has overflow pockets to facilitate large volume flows (ie. rain events).

### APPLICATIONS

Ideal for use in car parks, delivery docks, service areas, construction sites and industrial plants.

### SPECIFICATIONS

- 260GSM non woven geotextile
- 90 micron pore size
- Flow rate 80Lm<sup>2</sup>/sec

### OPTIONAL

- SpilMax Oil and Fuel Absorbent Boom
- Polypropylene
- 125mm Dia x 300mmL with 0.5mL cord
- Absorbent Capacity 2L
