

Stores compactly and deploys quickly.

Fence Booms are a fence like barrier designed to deflect or contain oil and floating debris. The fence boom is constructed using square and flat sections allowing it to be stored in bags, cages or reels. This PVC fence style oil containment boom stands up higher in the water. This particular boom is better suited to calm or sheltered waters.

FEATURES

- ✓ Heavy Duty 900gsm PVC
- ✓ UV resistant up to 5 years
