

Enretech Remedial Floor Sweep is designed for use on soil such as lawn areas and any location where the soil has been contaminated and requires treatment on the spot. It is a bio-remediation product, so when added to contaminated soil, the enzymatic action of the bacteria accelerates the natural decomposition of hydrocarbons, effectively returning the altered environment to its original condition with no disposal costs.

CODE	SIZE / WEIGHT	DIMENSIONS
CH3100	10 kg	0.50mL x 0.40mW x 0.15mH
