

SPILL KIT SERVICING

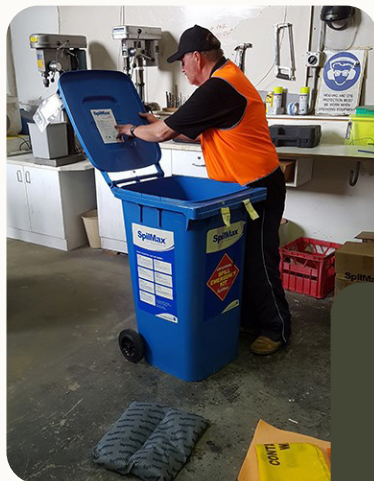

A comprehensive solution for supplying, auditing, and managing spill kits across your entire site. Our hassle-free preparedness programs ensure you're always ready for spills and compliant with environmental regulations.

PROGRAMS

Our Spill Kit Inspection and Maintenance Programs remove all the complications of maintaining your spill kits. Akuna Services will ensure your workplace is prepared in the case of a spill incident.

Each time we visit your site we will:

- Conduct a spill kit assessment
- Evaluate the contents of each spill kit
- Restock each spill kit as required
- Log the service on each spill kit tag
- Provide a report for your audit trail
- Create and maintain a mapping document citing the location of each spill kit on site

Do you know the location of each spill kit on your site?

Are you sure each spill kit is stocked and ready for a spill?

ADVANTAGES

1. Assists in environmental compliance with regulatory authorities.
2. Provide a management tool to assist in effective management of the site WHS and due diligence.
3. Raises staff awareness and knowledge of spill control and response procedures.
4. Ensures spill kits are fully stocked, maintained and ready.
5. Cost-effective (compared against internal staff)
6. Provides the opportunity for regular staff training & tool box talks.
